Re: SBIR for MonteCaldera Technologies Inc.

Dear Dr. Medina,

I am an assistant professor in the department of chemistry and physics at the University of Tennessee at Chattanooga. I am an expert in glasses, rheology, and the simulation of complex colloidal systems. The MonteCaldera technology has the capacity to solve problems in different areas of science. Furthermore, it has deep implications for industrial technologies centered around advanced materials. I fully support the efforts of Dr. Medina to obtain this funding.

Sincerely,

Luis E. Sanchez Diaz, Ph.D.  
Assistant Professor of Physics
